However, the caption box can take up space on your screen, interrupting your viewing experience. Even when you're not watching videos and only listening to songs, the Live Caption box will continue working. So, it's best to turn the feature off in certain scenarios. Let's learn how to disable it on Google Chrome. How to Turn Off Live Caption on Google Chrome There are two ways to turn off Live Caption on Google Chrome. The first step is pretty quick and easy. Access the Chrome settings by clicking on the three dots in the upper-right corner. From the left panel, click on Advanced > Accessibility. You'll see a new page where you can view the Live Caption setting. If it's turned on, you'll notice that the toggle is blue in color. Slide it back to turn it off. Another way to turn this feature off is through the Global Media Control icon in your Chrome menu bar. You can find it with the music logo and next to your extensions. Simply click on the logo, and you'll notice the Live Caption option below the song you're currently playing. Slide the toggle. How to Turn Off Live Caption on Mac You can turn off Live Caption on Mac in these simple steps: Click on the Apple logo. Go to System Preferences. Click on Accessibility. Select the Captions option.Untick the box that says Prefer Closed Captions and SDH. How to Turn Off Live Caption on Google Chrome on Mobile If you're on Android or iPhone, you can turn off the Live Caption option using several methods. On Android You can turn off the feature for most Android phones when you lower your volume. You can see this option in a box logo with lines inside. However, you might not always see this button beneath your volume option. In such cases, you can turn it off from your phone's settings. Here's an example of a Samsung phone. Go to Settings. Select Accessibility. Then, open Hearing enhancements.Go to Live Caption. Turn off Use Live Caption. Please note that some settings might differ depending on your phone's brand. For example, we found these settings on a Xiaomi phone. Go to Settings > Additional Settings. Tap on Accessibility.Then, go to Hearing > Caption Preferences. On iPhone Please follow these settings to turn off Live Caption on an iPhone: Go to Settings.Tap on Accessibility.In the hearing section, go to Subtitles/Captioning.Turn off the option that says Closed Captions + SDH. How to Turn Off Live Caption on YouTube The steps mentioned above to turn off Live Caption on Chrome work on most videos on the web. However, it doesn't work for the exclusive Closed Captions feature on YouTube. So, you'll need to turn off captions for YouTube as well. If a YouTube video has Closed Captions, you can notice a small logo "CC" underneath the video title and thumbnail. To turn the captions off, simply play the video and hover over the video. Now, click on the little logo with CC inside a box. You can find it at the bottom of the video. How to Customize Live Caption on Chrome If you want to change how your captions look on Chrome, you can make a few changes to it. You can expand the captions and change the font, size, background color, opacity, and even the location. Here's how you can customize it: Click on the three dots in the upper-right corner and open Settings. Go to the Advanced section and click on Accessibility. Click on Caption Preferences. Doing so will open settings in your Windows.Here, on the caption style, you'll get five options to change how your caption looks. Click on any and choose your preferred style. Scroll down to change the caption background. Further, you can scroll down again and choose to dim the window content to highlight the captions. 1. Open Chrome. Facebook displays captions on its videos to help you follow the content, but if you don't need them, they can be annoying. Here's how you can disable the captions on Facebook videos on desktop, iPhone, and iPad. Keep in mind that Facebook doesn't sync your caption settings across your devices, which means if you turn off the captions on your desktop, your phone will still display them, and vice versa. You'll have to turn them off individually on each of your devices. Also note that Facebook's Android app cannot display captions, so you won't have to do anything to disable them if you're using an Android device. RELATED: How to Get Live Captions For Any Video or Audio in Chrome Disable Facebook's Video Captions on Desktop To disable the captions on your desktop, first, launch your preferred web browser on your computer and open Facebook. Sign in to your account if you haven't already. After logging in, in Facebook's left sidebar, click your profile icon and choose "Settings & Privacy." In the "Settings & Privacy" menu, select "Settings." On the "Settings" page, from the left sidebar, choose "Videos." You'll land on a "Video Settings" page. Here, next to "Always Show Captions," click the drop-down menu and choose "Off." Facebook will automatically save your settings, and your captions are now disabled. RELATED: How to Turn On (or Off) Closed Captions on YouTube Hide Facebook's Video Captions on iPhone and iPad To turn off Facebook videos' captions on your iPhone or iPad, you'll use an option in your phone or tablet's Settings app. This means the change will affect not only Facebook but other apps that display captions on your device, so be sure you're comfortable with that before proceeding. To begin, launch the Settings app on your phone. Then choose the "General" option. On the "General" screen, select "Accessibility." On the "Accessibility" page, scroll all the way down and select "Subtitles & Captioning." Turn off the "Closed Captions + SDH" option. And that's all. Your Facebook video captions are now turned off on your iPhone or iPad. Like this, you can also disable Chrome's automatic live captions if you don't find them useful. RELATED: How to Turn Off Automatic Live Captions in Google Chrome After weeks of speculation, wait, and six beta versions, Google has finally launched the stable version of Android 10. Android Pie, which is the current OS on all non-Pixel devices, came with a bunch of improvements over Android Oreo, and we expect 10 to follow suit. As confirmed by beta releases, Android 10 is bringing a plethora of changes. From the most celebrated features, such as system-wide dark mode and optimized sharing menu, to new introductions, like detailed permission settings and chat bubbles, there's a lot to talk about. In this section, however, we are addressing one of the most underrated features of Android 10 — Live Caption. In an attempt to be more inclusive and make Android more accessible, Google has developed a feature called Live Caption, which could potentially be exceptionally beneficial for people with hearing impairment. As the name suggests, the feature captions any audio or video that's being played on your Android 10 device, in real-time, without requiring an internet connection. How to turn on Live captions on Android 10 Here's how to turn on the Live Caption feature on your Android 10 phone: Step 1: Play a video. Step 2: Tap either Volume key. Step 3: Tap on the caption button at the bottom of the volume slider. Captions will begin to show in the screen now. Step 4: Reposition the caption by tapping, holding, and moving it around the screen. Google is regarded as the best in the business when it comes to software development. So, we expect the captioning process to be almost flawless. Seeing one of the pioneers lead the ways is really encouraging, and we hope to see more such inclusive additions in the future. How to turn off Live captions on Android 10 Well, tap any volume button again, and tap the caption bottom below the volume slider again to turn it off now. Does Live caption on Android 10 require Internet connection? No, it doesn't. To verify it yourself, turn off the Internet connectivity (Wi-Fi and mobile data) and then activate the Live caption feature on any audio/video playing on. The device will effortlessly caption the speech. How are you liking the Live caption feature on Android 10? With Android 10 update, you also get Bubbles feature, which is pretty exciting too.
